PROJECTS

StockSense — Portfolio Analytics Platform

[Live Demo](#) | [GitHub](#)

- Architected full-stack investment portfolio platform with React/TypeScript frontend and async FastAPI backend for holdings, transactions, and backtesting.
- Engineered PostgreSQL data layer with async SQLAlchemy & Alembic migrations; implemented Redis caching for market data and JWT authentication.
- Developed portfolio optimization engine using pandas, NumPy, SciPy; containerized stack with Docker and covered core services with pytest.

Orchestra AI — Multi-Agent Flow System

[Live Demo](#) | [GitHub](#)

- Architected real-time multi-agent business automation platform that classifies, routes, and processes documents across 10 specialized AI agents (CEO, HR, Finance, Legal, IT, Marketing, PM, Compliance).
- Integrated interactive 'Ask this Agent' domain-tuned AI chat, OCR document scanner with sample presets, real-time analytics dashboard (Recharts), and searchable audit governance trail.

AutoResearch Agent — Autonomous AI Research System

[Live Demo](#) | [GitHub](#)

- Developed full-stack autonomous AI research agent that decomposes complex user queries, executes multi-source web and document searches, and synthesizes cited reports.
- Orchestrated 5-stage multi-agent workflow (Planner → Searcher → Reader → Reasoner → Reporter) using LangGraph state graphs with ChromaDB vector store for RAG reasoning.
